CARE OF YOUR CANVAS BACKDROP

Backdrops can tear, scratch and crease. To keep your backdrop as free as possible from creases keep rolled or hanging. Store in a dry and clean area. Your backdrop is not mould resistant.

Please be aware that dark drops or very light drops will show creases, marks, fluff, dirt and abrasion much more easily than other colours. Roll your drop tightly and secure well to help prevent abrasion from the back of the drop, especially whilst in transit.

For storage you could grab a pvc pipe or un-slotted agi pipe from a hardware store, to keep it laid in. I don't send them packaged like this in an attempt to keep weight down, and hence freight costs lower.

Use a two inch margin around the edge of the drop for securing. My backdrops are acrylic painted canvas. Water, sharp objects and abrasive material coming into contact with the drops can damage them. If cleaning is required spot clean only with a damp cloth or gently sweep with a broom or dustpan brush.

Please tag me in any photos uploaded on social media as I'd love to see your work and share your posts. I would also appreciate it if you could leave a review on my Facebook page. If however you are unhappy with anything please let me know prior to leaving any negative feedback.

I hope you enjoy using your MCB Studio Backdrops hand painted drop.

Cheers

Michelle Barton

Thank you for choosing MCB Studio Backdrops for your backdrop needs.
